### PLC DECEMBER 8, 2020

—

*What is DDI?*

**1**

---

### DDI= DATA DRIVEN INSTRUCTION

· Data-Driven Instruction is a highly effective, research-based training that guides teachers and administrators to spend less time teaching their students what they already know and more time on what their students need. It also answers the questions, "How do I know if my students are learning? And if they aren't, what do I do? Based on the protocol developed by Paul Bambrick-Santoyo and described in his books Driven by Data 2.0 and Leverage Leadership 2.0, TIL DDI advocates for a deeper analysis of student work.

**3**

---

### IN A VIRTUAL WORLD, HOW DO WE KNOW STUDENTS ARE LEARNING?

DDI-

"Defines the roadmap for rigor and adapts teaching to meet students' needs"

**4**

---

### CONTINUAL PROCESS

—

**5**

---

### DATA ANALYSIS PROCESS

1. Review the data by Standard and determine the 3 highest SEs and the 3 lowest SEs.

2. Review the data by question for the 3 lowest SEs.

3. Select one of the lowest standards to Unpack (High Yield)

4. Unpack the standard to determine knowledge and skills students need to master the standard.

5. Analyze the questions to determine the level of thinking and the error types.

6. Create a teacher exemplar of a response.
